

Commitment to Environmental Sustainability

principles to operations worldwide

- **Preserve** the environment for future generations by conserving energy and natural resources, reducing water usage, reusing and recycling materials and embracing more sustainable technologies.
- **Promote** environmental responsibility by implementing mechanisms and management systems to consistently monitor energy, greenhouse gas emissions, and other climate-related metrics, document baseline and obtain assurance of environmental metrics and establish future goals and targets.
- **Minimize** our environmental footprint and impacts throughout the life cycle of our products and service offerings by avoiding environmental releases such as GHG and other emissions.
- **Engage** stakeholders and employees in our efforts to improve environmental performance

by eliciting feedback and understanding and addressing concerns appropriately

- **Communicate** to ensure transparency by providing regular updates on our environmental goals and key indicators in accordance with recognized reporting protocols and regulatory frameworks
- **Educate** employees by raising awareness of environmental issues and
